

# IRRIGATION CYCLE CHANGE

We are now in the season where fewer people require irrigation but where some want it more frequently to water winter grass. As a result, watch for the following changes:

1. Cycles will most likely be much shorter. Those on both sides of 185th who are accustomed to getting water several days after a cycle starts may find they are among the first to get water. When you place an order, know that you may receive water earlier than you do during the summer.
2. We will be on weekly irrigation cycles through the end of November, as follows:

Order Deadline	Cycle Begins
10/21	10/25
10/28	11/1
11/4	11/8
11/11	11/15
11/18	11/22
11/25	11/29
Return to bi-weekly cycles	
12/9	12/13
12/23	12/27

Please be sure when you place an order that you are ordering for the right cycle!  
Thanks.
